BIOCLEAR MATRIX KITS:

- Developed by Dr David Clark the BIOCLEAR matrix system provides simple and easy to achieve Anterior and Posterior restorations using the composite injection technique.
- BIOCLEAR matrix system utilises anatomical Mylar matrices which are only 50 micron thick.
- Uniquely shaped matrices when cured through achieve perfect glass-like interproximal finish.
- Unlike flat Mylar the BIOCLEAR matrices contain a built-in emergence profile for delivering unsurpassed aesthetics that would otherwise be difficult and time consuming to accomplish.
- There are two kits available: Anterior and Posterior restorations.
- The Anterior kit is designed to treat Medium to Deep Anterior Caries Lesions, Black Triangles and Diastema Closures
- The BioFit Posterior kit is designed to treat minimally invasive Small Posterior Cavities or a Large Deep Caries preparation.
- BioFit Posterior matrices help create snug, broad & tight contacts for all Class II restorations.

BIOFIT POSTERIOR KIT:

- 75 x BioFit Translucent 76 Micron Matrices (4.5mm, 5.5mm & 6.5mm)
- 75 x BioFit Blue 50 Micron Matrices (4.5mm, 5.5mm & 6.5mm)
- 80 x Diamond Wedges (16 x Small, Medium, Large, Extra Large & Deep Caries)
- 2 x Twin Rings (Pre-Molar & Molar)
- Twin Ring Forcep
- Curved Matrix Tweezers
- Posterior Instruction Card.

Anterior Kit Normally \$890
Special \$790 + Bonus Anterior Composite Instrument worth \$90 free

ANTERIOR KIT:

135 MATRICES FOR ANTERIOR, BLACK TRIANGLES AND DIASTEMA CLOSURE RESTORATIONS

- 15 x A101, A102, A103, A104, A105 (Anterior Matrices)
- 15 x DC201, DC202, DC203, DC204 (Diastema Closure Matrices)
- 64 x Diamond Wedges (16 x Small, Medium, Large & Extra Large)
- 4 x TruContacts (2 x Blue Saws, 1 x Red & 1 x Orange Sander)
- Anterior Instruction Card
- 5 x Patient Waiting Room Marketing Brochures

Anterior Kit Normally \$690
Special \$590 + Bonus Anterior Composite Instrument worth \$90 free

Don't miss this rare opportunity to see DR DAVID CLARK TEACHING BIOCLEAR FOR THE FIRST TIME IN AUSTRALIA

EXCLUSIVE SYDNEY ONLY SEMINAR & LIVE HANDS-ON DEMONSTRATION

Dr David Clark DDS, Inventor of BIOCLEAR Matrix System

- Dr Clark's goal with composite dentistry has always been to elevate its longevity and health to the "Gold Standard"
- 25 Years of clinical microscope dentistry in a hometown practice
- Lab research, hundreds of lectures and hand on courses has enabled him to create matrix systems and methods re-inventing restorative dentistry
- Graduated in 1986 with dental degree from University of Washington School of Dentistry

SPACES STRICTLY LIMITED TO 100!

Monday 25th March 2019

IMPLANTS: MINI AND REGULAR ONE PIECE

- One piece, self-tapping and immediate loading
- Mini implants are less invasive, suit narrow ridges
- Makes bone grafting often unnecessary
- Treated surface for faster Osseo-integration
- Gamma Ray Sterile
- Inexpensive high quality titanium implants made in Israel
- Two styles available for both Crown and Bridge or Denture Stabilisation

CROWN & BRIDGE RANGE:

- Mini Implants 2.40mm available in 10mm & 13mm lengths
- Regular Implants: 2.80mm, 3.70mm & 4.50mm available in 10mm & 13mm lengths

DENTURE STABILISATION RANGE:

- Mini Implants 2.40mm available in 11.5mm & 13mm lengths
- Regular Implants: 2.80mm, 3.30mm available in 10mm & 13mm lengths

The Mesio-Distal Surgical Guide for accurate placement of Implants; Inexpensive, Autoclavable & Re-Usable.

- Provides precise Mesio-Distal spacing and placement of implants when working free hand
- Eliminates errors of free hand misplaced implants, as guides and drills match teeth sizes
- Correct parallel axis alignment with the adjacent teeth
- Completely compatible with your existing implant system and technique
- You don't change the way you place implants except in accuracy
- Perfectly centres the axis of your implant for future crown restoration
- MD Guide is suitable for single or multiple implants in any size diameter
- Each Guide and Drill comes in 5 sizes: 6mm, 7.5mm, 9mm, 10.5mm & 12mm

PREDICTABLE ATRAUMATIC EXTRACTIONS IN MOMENTS: PHYSICS FORCEPS

- The Physics Forceps **provide predictable and simple atraumatic extractions in minutes**
- Operates as a lingual elevator, using first class lever mechanics with slow wrist movement – **no squeezing required**
- Using the beak and bumper technique the instrument **simply rolls the tooth out** of the socket, rather than pulling it
- The wide bumper acts as the fulcrum and distributes forces over a wider area which **reinforces and protects the buccal plate**
- The Physics Forceps place a constant load on the tooth allowing creep to build, **releasing hyaluronic acid, the periodontal ligament breaks down**
- Studies show this breakdown occurs much faster than conventional methods that rely on rocking or brute force techniques
- The Forceps are effective in most cases including; badly decayed or broken down teeth, endodontically treated teeth, fractured, curved or long rooted molars and cuspids
- The instruments are ideal for implantologists that need to preserve the surrounding bone and tissue for immediate loading implants
- Increase time in patient schedule by eliminating the breaking of root tips or surgically removing a tooth
- **Improves the patient experience** without the brute force of pulling or surgery, therefore decreasing patient recovery time
- Eliminate the stress of extractions from your practice and create positive patient experiences
- The Physics Forceps are available in two sets: The Standard Set and the Molar Set
- **The Standard Series of 4 Instruments includes:** Upper Left, Upper Right, Upper Anterior and Lower Universal cover all teeth except third molars
- **The Molar Series of 2 instruments EZ1 & EZ2** allows access for hard to reach second molars and erupted third molars

THE STANDARD SERIES:
The Standard Set of 4 Instruments includes:
Upper Left, Upper Right, Upper Anterior & Lower Universal, 24pk of bumper guards, clinical training DVD.
Normally \$2,500
Special \$2,200 + Bonus Extraction Technique DVD + Distal Elevator Instrument worth \$800 Free

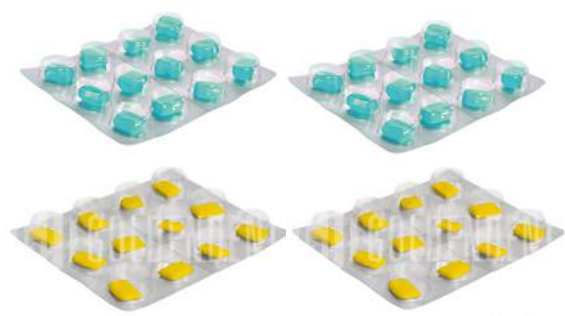

THE MOLAR SERIES: EZ1 & EZ2

The Set of 2 Instruments includes: EZ1 & EZ2 instruments, 12pk of bumper guards and clinical training DVD.
Normally \$1,550
Special \$1,250 + Bonus 24pk of Bumper Guards worth \$30 Free

BUMPER GUARD 24PK REFILLS:

24pk only \$30 ea (only \$1.25 per patient)

CROWN AND BRIDGE REMOVER:

SAVE THE CROWN & SAVE THE TOOTH WITH THE WAM KEY

- Allows you to **save and reuse a Crown without fracturing the tooth structure or destroying the preparation**
- Simply drill a thin window into the centre of cement layer of the crown using a carbide bur
- Insert the key and rotate, the crown will pop off in seconds
- Great for those patients who cannot afford a new crown
- 3x different Key sizes: #1 Small, #2 Medium, #3 Large

Only \$360 + Bonus 10pk carbide burs worth \$55 Free

SOFT TISSUE LASERS: Why Laser Dentistry?

LASERS CUT, CAUTERISE, COAGULATE AND STERILISE

- Soft Tissue lasers offer many benefits for both your practice & patients including:
- Decreased healing time for patient (excellent haemostasis)
- Typically eliminates the need for anaesthesia
- Significantly reduces post-operative pain, swelling and discomfort
- No suturing required
- Safe around implants and patients with pacemakers
- Increased referrals as a result of positive patient experience
- Increased revenue from additional new procedures that can be offered
- Increased patient acceptance
- Healthier approach to tissue management as opposed to scalpel or electrocautery
- **General Dentistry procedures include:** Laser Troughing, Class V Restoration, Recontouring, Frenectomy, Gingivectomy, Hyperplasia, Implant Recovery, Lesion removal
- **Periodontal and Hygiene applications include:** Laser Bacterial Reduction (LBR), Sulcular Debridement, Desensitisation

Comparison Chart: Laser vs. Traditional Methods

Benefits	DenMat Diode Lasers	Scalpel	Electrocautery
Efficient and effective soft-tissue removal	✓	✓	✓
Excellent hemostasis	✓	✗	✓
Safe around implants	✓	✓	✗
Typically requires no anesthesia	✓	✗	✗
Reduced post-operative pain	✓	✗	✗
Reduced swelling and discomfort	✓	✗	✗
No periodontal pack or suturing required	✓	✗	✗

NV PRO 3 CORDLESS MICROLASER

- Soft Tissue Diode Pen laser
- **Cordless wire free convenience = no clutter or cords**
- 2 watts of maximum power on continuous wave or pulse mode output at 808nm
- 12 preset procedures optimised for all Perio, Restorative and Orthodontic procedures
- Lightweight only 59 grams
- 30 Minutes of continuous operation at 1.2 watts of power, for more than 15 procedures before changing batteries
- Disposable optical fibre tips available for both Cutting 5mm and Perio 7mm
- Increase the amount of procedures offered by your practice, therefore increasing your practice profitability
- Can be used in continuous or pulse mode
- Includes 2 x Rechargeable Lithium-Ion batteries with overcharge and undercharge protection
- Sensor to prevent overheating
- Includes 808nm specific protective glasses
- Wireless foot pedal for convenience between operatories
- Recommended by Dr Michael Miyasaki DDS, Sacramento CA
- Award winning – top awards including Reality 5 star award and Dental Advisor Top Soft Tissue Laser award
- 1 Year Warranty

Normally \$8900
 Special \$7900
+ BONUS ONLINE LASER TRAINING COURSE WORTH \$1250 FREE
 Refill 5mm Cutting Tips 25pk \$295 ea
 Refill 7mm Perio Tips 25pk \$295 ea

SOL LASER

- Soft Tissue Diode laser
- **Unique blue aiming beam for high contrast**
- 3 watt maximum output on continuous wave at 808nm
- 5 watt maximum output on pulse mode at 808nm
- 3 easy to use preset functions; Debride, Perio or Cut
- 1 Custom setting to save your most used procedure
- 3 hour continuous operation at 1.2 watts of power
- Lightweight, compact, portable only 1.2kg
- Wireless foot pedal for convenience between operatories
- Disposable optical fibre tips available for both Cutting 4mm and Perio 8mm
- Includes 808nm specific protective glasses
- Audible sound effect when buttons are pressed
- 2 year warranty

Normally \$5950.
 Special \$5500 +
BONUS ONLINE LASER TRAINING COURSE WORTH \$1250 FREE

Refill 4mm Cutting Tips 25pk \$295 ea, Refill 8mm Perio Tips 25pk \$295 ea

LASER PROTECTION INSERT FOR LOUPES

- Laser protection insert that clips onto Through the Lens Style Loupes
- For use with Soft Tissue Lasers with 808nm output only
- Compatible with both NV PRO 3 AND SOL Soft Tissue Lasers
- Designed for PeriOptix TTL Loupes

Normally \$750 ea Special \$650 ea

ULTRA LIGHTWEIGHT MAGNIFICATION LOUPES BY PERIOPTIX

NOT ONLY FOR MAGNIFICATION: WHY YOU SHOULD WEAR MAGNIFICATION LOUPES

- Over 60% of Dental Practitioners suffer from back and neck pain
- Over 90% suffer from eye strain
- PeriOptix lightweight fitted Loupes promote proper posture, reduce fatigue, enhance vision
- **Wearing loupes will INCREASE career longevity - INVEST IN YOUR FUTURE!**

"Not only do these lightweight Loupes relieve fatigue, but my ergonomics are always in-check because of the custom measurements. I love my PeriOptix!"

Annette Stelter
Coast Oral Facial Institute
Newport Beach, CA

PERIOPTIX THROUGH THE LENS MAGNIFICATION

- Through the Lens 2.7 x Magnification Loupes with 10cm depth of field
- Lightweight Perivista Sports Frame only 44grams - feels like you are not wearing loupes!
- Unbelievable clarity with no adjusting unlike Flip-Up Loupes
- Patented adjustable declination viewing angle feature (3 x angles that can be adjusted in the arms)
- Adjustable two position nosepiece
- 2.7 magnification is ideal for general dentistry, cosmetic dentistry and Endo procedures
- Frame has unique feature to add a RX Insert if Prescription Lens are required to be worn
- Available in 4 x Working Distances: Short (30.5cm to 38cm), Regular (38cm to 45.5cm), Long (45.5cm to 53cm) and XL (53cm to 60.5cm)
- A Certified PeriOptix Loupe Specialist can help you get fitted with the correct loupe required for your exact measurements.
- PeriOptix Through the Lens Loupes have the option to add a LED light for increased illumination and visibility
- Available in Red or Black PeriVista Sports Frame

Normally \$2200
Special \$1980
(includes Loupes, Carry Case, Loupe Neck Strap, Anti-fog Solution & Cleaning Cloth)

RX INSERT FOR PRESCRIPTION LENS

- The RX Insert provides the option to wear prescription corrective lens with the PeriOptix Through the Lens PeriVista sports frame
- Your optometrist will be able to fit your prescription lens into the RX Insert Frame (**depending on how thick your lenses are**)
- Simply unclip the nose pads and click on the RX Insert
- Most lightweight option weighs only 2gm (without lens)

Normally \$249 ea Special \$149 ea

PERIOPTIX ILLUMINATION MICROLINE MINI LED HEADLIGHT

- The Lightest Mini LED Headlight available (**weighs less than 9 grams**)
- **Brightest Mini LED Headlight 40,000 LUX**
- 8 hour rechargeable, replacement Li-Ion battery
- Battery Pack includes On/Off button, Intensity dial and clip for belt
- 90% charge in only 90 minutes
- Attaches to all PeriOptix and most competitor loupes
- Soft headband option available to wear separately from loupes if desired
- All parts replaceable - unlike other companies lights
- Kit includes: LED Lamphood, Shirt Clip, Li-Ion battery, Battery Pack, Battery Charger and carry case.
- **Reality Five Star Award - Reality's Choices for Best Mini Headlight**

Kit Normally \$1690
Special \$1490
+ BONUS COMPOSITE FILTER WORTH \$120 FREE

FIRE FLY CORDLESS HEADLIGHT SYSTEM

- Unique Cordless LED Headlight with **NO ANNOYING CORDS OR HEAVY POWER PACKS**
- Light pod weighs only 28 grams (lightweight when compared to other brands)
- Adjustable brightness 30,000 to 32,000 lux (simply twist light pod to adjust intensity)
- Light pod simply clicks onto magnetic mount provided (simply twist to turn on and off)
- Magnetic mount available for all PeriOptix loupes and majority of competing brands
- Soft headband provides the option to wear separately to loupes or without loupes
- Pods are easy to clean, reducing the risk of cross contamination
- Optimised spot size that eliminates the "uncomfortable halo" in your patients eyes
- Pods now available in 3 x colours: **Red, Blue** and **Black** to match PeriVisa TTL Sportsframe
- 1 year limited warranty

FIREFLY KIT INCLUDES: 2 x light pods, magnetic loupe mount, dual charging base for pods, USB cord & power adaptor, 2 x composite filters, cleaning cloth, shock resistant carry case & instructions

Kit Normally \$2,299 **Special \$1,799**

SOLARIS BRIGHTEST LED HEADLIGHT

- **Brightest** LED Headlight available **80,000 lux**
- **Weighs only 14 grams** (lightweight bright LED headlight)
- 90% charge in only 90 minutes
- Includes 2 x rechargeable, replaceable Li-Ion batteries
- Battery life: 5 hours
- Field Illumination: 8cm
- Mounts available for all PeriOptix loupes and majority of competing brands
- Soft headband provides the option to wear separately to loupes or without loupes
- **Solaris is ideal for Endodontists, Maxillofacial Surgeons and Oral Surgery** when the most amount of illumination is required
- Easy to replace cable, all parts are replaceable (1 year limited warranty)

SOLARIS KIT INCLUDES: Headlamp and cable, loupe mount, battery pack with belt clip, 2 x rechargeable batteries, battery charger and power adapter, cleaning cloth, shock resistant carry case & instructions

Kit Normally \$2,099 **Special \$1,699**

RESTORATIVE TOOLS OF THE TRADE:

Flashmax P3 Curing Light - NEW IMPROVED MODEL

- The most powerful LED curing light 1000-6000mw/cm²
- 1 & 3 sec activation buttons on top & underneath
- IAF - Intelligent Automated Functions - programmable modes
- 4mm & 8mm Adjustable tips
- Made in Denmark
- **New stronger case**
- **New improved charging base**
- **2 year warranty**

Normally \$1590 **Special only \$1490**
BUY 2 + PAY ONLY \$1390 EA

Co Max Compule Dispensing Gun

- Accepts all composite compules
- Ergonomic design
- Effortlessly extrudes highly filled composites
- High mechanical advantage mechanism
- Easy loading & unloading
- Completely autoclavable
- Does not pinch as you squeeze / dispense

Special only \$295
\$100 OFF

The Comproject - All Metal Compule Gun

- No more cracked plastic guns!
- Has a spring loaded plunger that firmly holds & **prevents compule wobble**
- Compules are easily loaded & unloaded with just a flick of the wrist
- Made in Denmark
- **5 Year Warranty**

Special only \$395
\$100 OFF

Microetcher IIA - Intra-Oral Sandblaster

- Increases surface area, means all mechanical bonding procedures are improved
- **Improves bond strengths up to 400%** including metals, porcelain & composites
- Greatly reduces failures
- **Provides precise surface micro-roughening**
- Can remove residual cements (e.g residue from ortho brackets)
- Can be used for minor preps (e.g. Class I & V, as well as pit & fissure)
- Has Fully 360 degree rotatable tip - can be removed for autoclaving
- Fully autoclavable (**back flush before autoclaving**)

ONLY \$590 - \$60 OFF!

Plus **FREE BONUS** Quick Disconnect fitting (\$100 value) and 1kg Aluminium Oxide 50 micron (\$40 value)

TOTAL VALUE OF BONUSES \$140
